## Technical Data Sheet

### Megatron 5<sup>th</sup> Wheel Grease

#### Specifications, Performance Standards & Recommendations

- KP2N-20 (DIN 51825)
- P-64 Fives Cincinati

#### Description

Megatron 5<sup>th</sup> Wheel Grease is manufactured using highly refined mineral base oils which are carefully selected and then fortified with synthetic polymers, producing a highly shear stable foundation for the grease. This base oil foundation allows the product to perform in applications where heavy duty loads are typical, specifically fifth-wheel hitches used in trailer and trucking applications.

Fifth-wheel hitches must be lubricated in order to minimize wear between the fifth-wheel plate and the trailer to ensure that the trailer can pivot behind the pull vehicle. This allows for increased fuel economy, reduced abnormal steering-component and tire wear and reduces the tendency towards jack-knifing.

#### Benefits

- Outstanding protection against wear and corrosion.
- Waterproof – resists washout.
- Withstands high loads and pressures.
- Provides long service life.

#### Typical Physical Characteristics

Megatron 5 <sup>th</sup> Wheel Grease	
NLGI Grade	2
Thickener Type	Calcium Sulphate
4-Ball Wear Test Scar	<0.45 mm
4-Ball Weld Load	620 kg
Timken OK Load	75 lb

The values of the specifications shown in this table are typical values given as an indication only.

#### Pack Sizes

- 500g plastic tubs
- 5kg plastic pails
- 15kg plastic pails
- 18kg plastic pails
- 50kg steel drums
- 180kg steel open top drums

#### Health and Safety Information

For recommendations on safe handling and use of this product, please refer to the Material Safety Data sheet available on [www.tronlubricants.com](http://www.tronlubricants.com)

Misrepresentation Act 1967. Trade description Act 1968. The information in this publication is based on our experience and reports from customers. There are many factors outside our control and knowledge which effect the use and performance of our products for which reason no warranty is given, express or implied. This information sheet was prepared from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected. It is the responsibility of the user to ensure that the products are used in the applications for which they are intended.
