

Heavy Duty Grease Range

Developed for heavy duty applications

Tron Lubricants Heavy Duty Grease is manufactured using highly refined mineral base oils which are carefully selected and then fortified with synthetic polymers, producing a highly shear stable foundation for the grease. This base oil foundation allows the product to perform in applications where heavy duty loads are typical.

Tron Lubricants Heavy Duty Grease is manufactured to a NLGI 2 grade resulting in a grease of medium to soft consistency. These products contains a blend of synthetic tackifiers, increasing its ability to resist water and adherence with all surfaces.

Tron Lubricants Heavy Duty Grease is tan in colour and whose formulation includes a full treat of extreme pressure (EP) and corrosion preventative additives enabling the grease to meet or exceed internationally recognised performance standards.

Key Benefits

- Very good thermal stability.
- Exhibits very good to excellent anti-rust and anti-corrosion properties.
- The thickener has very good natural attributes which displace and resist water ingress.
- Exhibits excellent resistance to heat.

>11 Exported to 11 of the
harshest African
countries.

Preferred Partner

First and only focus on lubricants;
First choice for the customer based on:

- World class development
- First class quality
- World class customer service
- First class logistic solutions

Environmental Care

Tron Lubricants is dedicated to the highest level of Environmental Care. Tron Lubricants has developed a unique “Cradle To Grave” solution & is committed to collecting/disposing every drop of product it produces in a safe and environmentally friendly manner. Consult your Tron rep today for more information.

Productivity

Tron Lubricants offers the highest quality lubricants coupled with class leading additive technology to ensure that your machinery never lets you down. Tron Lubricants gets working when the work gets tough! Tron Lubricants is a brand you can truly rely on.
